Score Criterion 0-10 HURT - Adequate pain control & breathing ability is of top concern. Trouble breathing outweighs all concerns.

Quality of Life Scale (The HHHHHMM Scale)

2. An integrative definition of quality of life When we evaluate the state of human affairs or propose policies to improve them, we typically proceed from assumptions about the characteristics of a good life and strategies for achieving them. We might suppose, for example, that access to particular resources is a part of a good life and ...

Quality of life: An approach integrating opportunities

Quality of life is a subjective construct which varies with the population studied. It is generally conceptualized as a multi-dimensional construct made up of a number of independent domains including physical health, psychological well-being, social relationships, functional roles and subjective sense of life satisfaction.

QUALITY OF LIFE ASSESSMENT MANUAL

Life-expectancy is the standard measure of the length of people's life. Life-expectancy measures how long on average people could expect to live based on the age specific mortality rates currently prevailing. Life-expectancy can be computed at birth and at various ages.
