A nonlinear model is proposed to study the response of sea level to global warming. The effect of sea level rise on the population dynamics is also investigated.

### **Effect of global warming on sea level rise: A modeling study**

Our study of hydraulic fracturing and its potential impact on drinking water resources: We studied the relationship between hydraulic fracturing for oil and natural gas and drinking water resources. The study includes a review of published literature, analysis of existing data, scenario evaluation and modeling, laboratory studies, and case studies.
