Enterprise Architecture as Business Capabilities Architecture

1 Reference Architectures; Why, What and How White Paper Resulting from Architecture Forum Meeting March 12 & 13, 2007 (Hoboken NJ, USA) Edited by:

Reference Architectures; Why, What and How

Overview. The NIST Enterprise Architecture Model is a five-layered model for enterprise architecture, designed for organizing, planning, and building an integrated set of information and information technology architectures. The five layers are defined separately but are interrelated and interwoven. The model defined the interrelation as follows: ...

Download this computer networking PDF excerpt from "Computer Networks," a book that addresses the key principles of computer networks. In Chapter 1, Foundation, learn how local and wide area networks (WANs) are now built to connect more than computers.

“Computer Networks” PDF: Free chapter download

How many layers are there in an enterprise-architecture? If we read any of the standard texts, you’ll see there are several popular answers. For example, Archimate says there are three: Business, Application and Technology. TOGAF says there are four: Business, Data, Application and Technology (though in the ADM, “Data” and “Application” are bundled together as a single layer ...

On layers in enterprise-architecture “ Tom Graves / Tetradian

The Open Group Architecture Framework (TOGAF) is a framework - a detailed method and a set of supporting tools - for developing an enterprise architecture.
