Adaptive Management - FOS Online

A biodiversity action plan (BAP) is an internationally recognized program addressing threatened species and habitats and is designed to protect and restore biological systems. The original impetus for these plans derives from the 1992 Convention on Biological Diversity (CBD). As of 2009, 191 countries have ratified the CBD, but only a fraction of these have developed substantive BAP documents.

Preparing a Data Input File for EstimateS EstimateS Filetypes: The Load Data Input File Screen. In EstimateS 9, the Load Data Input File command (from the File menu) presents a set of four filetype options. Specific data input formats for these filetype options are discussed in a later section of this Guide. This section describes the four filetypes and their uses.

EstimateS: Biodiversity Estimation

Summary. Penn State University anthropologist Dr. Nina Jablonski walks us through the evidence that the

different shades of skin color among human populations arose as adaptations to the intensity of ultraviolet radiation in different parts of the world.

Senior Biology - 'Deadly' Extended Experimental Investigations

A major theme of biology is the great biodiversity of life. Overgeneralizations inaccurately minimize biodiversity. Teaching publications sometimes state that all plants are photosynthetic.

ActionBioscience - promoting bioscience literacy

The Convention on Biological Diversity (CBD), known informally as the Biodiversity Convention, is a multilateral treaty. The Convention has three main goals including: the conservation of biological diversity (or biodiversity); the sustainable use of its components; and the fair and equitable sharing of benefits arising from genetic resources.. In other words, its objective is to develop ...
