Department of Mechanical Engineering and Mechanics Fundamentals of Computer Aided Design  
Geometrical Dimensioning & Tolerancing (GD&T) MEM 201

### **Geometrical Dimensioning & Tolerancing (GD&T)**

An engineering drawing, a type of technical drawing, is used to fully and clearly define requirements for engineered items.. Engineering drawing (the activity) produces engineering drawings (the documents). More than merely the drawing of pictures, it is also a language—a graphical language that communicates ideas and information from one mind to another.

In about 1413 a contemporary of Ghiberti, Filippo Brunelleschi, demonstrated the geometrical method of perspective, used today by artists, by painting the outlines of various Florentine buildings onto a mirror. When the building's outline was continued, he noticed that all of the lines converged on the horizon line.

In my classes, I demonstrate Pure Contour Drawing, describing how to use the method as I draw if I can manage to keep talking (an L-mode function) while I'm drawing. Usually, I start out all right but begin trailing off in mid-sentence after a minute or so. By that time, however, my students have the idea.
