GROUNDWATER LEVEL MONITORING 6 Innovations in Water Monitoring The Rugged TROLL 100 and 200 instruments are designed for long- and short-term groundwater and surface-water monitoring.

#### **GROUNDWATER LEVEL MONITORING - Davidson**

The current groundwater level monitoring network is designed to measure water levels in the more significant aquifers in Minnesota. However, to fully assess the status of the state's groundwater resource, the non-aquifer formations that convey water to, from, or between aquifers also need to be monitored.
