This reproduction was printed from a digital file created at the Library of Congress as part of an extensive scanning effort started with a generous donation from the Alfred P. Sloan Foundation.

Harlaem River; its use previous to and since the

In 1902, over a thousand rowers made use of the Harlem River. A number of boat clubs were located along its shores, and remained until 1978, when the last boathouse at Sherman Creek burned down. The Harlem River is the traditional rowing course for New York, analogous to the Charles River in Boston and the Schuylkill River in Philadelphia.

Harlem River - Wikipedia

at the proposed project site, is the Harlem River. The Harlem River is located along the western boundary of the water treatment plant site. It is a navigable tidal channel, eight miles long, in New York City, separating Manhattan from the Bronx and connecting the Hudson and East Rivers.

The watershed draining the Harlem River Site is restricted

The Harlem River is an 8-mile (13 km) tidal strait flowing between the Hudson River and the East River and separating the island of Manhattan from the Bronx on the New York mainland. The northern stretch, also called the Spuyten Duyvil ("spewing devil") Creek, has been significantly altered for navigation purposes.
