Harmonic Analysis of Tempered Distributions on Semisimple Lie Groups of Real Rank One JAMES G. ARTHUR SUMMARY. Let G be a real semisimple Lie group. Harish-Chandra has defined the Schwartz space, $V[G]$, on G . A tempered distribution on G is a continuous linear functional on RG). If the real rank of G equals one, Harish-Chandra has published a ...

Real-Variable Methods in Harmonic Analysis deals with the unity of several areas in harmonic analysis, with emphasis on real-variable methods. Active areas of research in this field are discussed, from the Calderón-Zygmund theory of singular integral operators to the Muckenhoupt theory of A_p weights and the Burkholder-Gundy theory of good λ inequalities.
