heart disease volume 1 pdf

Coronary artery disease (CAD), also known as ischemic heart disease (IHD), involves the reduction of blood flow to the heart muscle due to build up of plaque in the arteries of the heart. It is the most common of the cardiovascular diseases. Types include stable angina, unstable angina, myocardial infarction, and sudden cardiac death. A common symptom is chest pain or discomfort which may ...

2014 AHA/ACC Guideline for the Management of Patients With

Linus Pauling's specific therapy for cardiovascular and heart diseases are high dosages of two essential nutrients; vitamin C and the amino acid lysine. Vitamin C is required to strengthen arteries so that the body does not try to patch arteries with "plaster casts" (atherosclerosis).; Lysine is an Lp(a) binding inhibitor, meaning at sufficient dosage it can reverse the plaster cast build-up ...

Figure 1. Histogram of the incidence of congenital heart disease per 1,000 live births in 62 reports. The six highest values all came from echocardiographic studies of infants in the newborn nursery.

The incidence of congenital heart disease - ScienceDirect

A congenital heart defect (CHD), also known as a congenital heart anomaly or congenital heart disease, is a problem in the structure of the heart that is present at birth. Signs and symptoms depend on the specific type of problem. Symptoms can vary from none to life-threatening. When present they may include rapid breathing, bluish skin, poor weight gain, and feeling tired.

Congenital heart defect - Wikipedia

x The amount of extravascular lung water (EVLW) could change in donor lungs in a time-dependent fashion during the procurement process. For brain dead donors, EVLW amount can be affected by the proinflammatory response, cardiac dysfunction, ventilator management or fluid replacement during the donor management period. 1 In the circumstance of donation after circulatory death, hypoxic pulmonary ...

Year in Cardiology 2018. The 2018 Year in Cardiology series summarises key topics in cardiology from the past 12 months. From arrhythmias to cardiac devices, and valvular heart disease to acute coronary syndromes, the series looks back at the year's most important developments.

European Heart Journal | Oxford Academic

Heart failure (HF) and liver disease often co-exist because of systemic disorders and diseases that affect both organs (alcohol abuse, drugs, inflammation, autoimmunity, infections) as well as because of complex cardiohepatic interactions. HF may lead to liver disease, which adversely affects prognosis and complicates management of HF.

Heart Failure and Liver Disease: Cardiohepatic

Lifestyle approaches aren't only safer and cheaper—they can work better, because they let us treat the actual cause of the disease.

MD; Gina Gendy, MD; A way to reverse CAD?

The best way to prevent a massive heart attack, to prevent atherosclerosis, is to start at step number one—blocking the buildup of cholesterol, which is a direct result of having too much LDL cholesterol in our bloodstream, which is a direct result of eating three things: (1) saturated fat, found mostly in meat, dairy, and eggs; (2) trans fat, found mostly in processed junk and animal ...
