The BTEX Complex. Commonly referred to as gasoline aromatics, these compounds are refined from low-octane petroleum products into a high-octane gasoline additive. While some volume of BTEX is native to gasoline, it is also added to finished gasoline to boost its octane rating. The total volume of BTEX...

Ethanol and Octane Number  
Ethanol has high RON  
RON = 109  
Relatively low cost source of octane  
What about charge cooling?  
Ethanol almost 3x higher than gasoline  
MIT study suggests 1 RON unit increase for every 3°C additional cooling  
Optimum blend likely 20-40% ethanol  
Non-linear benefit of higher octane vs. linear decrease in ...

Airplanes are still allowed to use leaded gasoline (known as AvGas), and octane ratings of 100 or more are commonly used in super-high-performance piston airplane engines. In the case of AvGas, 100 is the gasoline's performance rating, not the percentage of actual octane in the gas.
