Mobile telephony is the provision of telephone services to phones which may move around freely rather than stay fixed in one location. Mobile phones connect to a terrestrial cellular network of base stations (), whereas satellite phones connect to orbiting satellites. Both networks are interconnected to the public switched telephone network to allow any phone in the world to be dialed.

Mobile telephony - Wikipedia

A social networking service (also social networking site, or SNS or social media) is an online platform which people use to build social networks or social relations with other people who share similar personal or career interests, activities, backgrounds or real-life connections.. The social networks are distributed across various computer networks. The social networks are inherently computer ...
