In this exercise, several unbelievable tasks will be performed that will be viewed as miraculous. These include opening a banana and finding it already sliced, submerging a hand in a jar of water and pulling it out completely dry, and using a playing card to prevent water spilling out of a glass of water even when completely turned upside-down and the card removed.

From a physics perspective, living beings are thermodynamic systems with an organized molecular structure that can reproduce itself and evolve as survival dictates. Thermodynamically, life has been described as an open system which makes use of gradients in its surroundings to create imperfect copies of itself. Hence, life is a self-sustained chemical system capable of undergoing Darwinian ...
