Planetary habitability is the measure of a planet's or a natural satellite's potential to develop and maintain environments hospitable to life. Life may be generated directly on a planet or satellite endogenously or be transferred to it from another body, a hypothetical process known as panspermia. Environments do not need to contain life to be considered habitable nor are accepted habitable ...

Planning a trip to Croatia? I wish I were joining you! It's hard to pick a favorite country when you travel as much as I do, but I can't lie -- if I had to choose, it would probably be Croatia. I first wanted to visit Croatia after seeing photos of its beautiful beaches, but after visiting for the first time in 2012, I fell in love. What I love about Croatia is that it combines outstanding ...
