The context for World War II in American history is well documented. Indeed, this era is recent enough that many historical accounts include blends of recovered archives and stakeholder interviews. Such context seems to be assumed in Douglas Stark's *Wartime Basketball: The Emergence of a National Sport during World War II*. For as detailed and thorough as this manuscript is regarding the games, leagues, and tournaments of professional basketball during the war, the author provides little context.

Before World War II, basketball playing styles often varied by region, but the war tended to knit these styles together as pro and amateur teams consolidated with so many players in military service.
